Signal Processing 26 (1992) 393–394
Elsevier

Cumulative contents

Volume 26, No. 1, January 1992

Image Processing

E.R. Davies
A skimming technique for fast accurate edge detection 1

Y. Wang and W. Lu
Multiobjective optimization approach to image reconstruction from projections 17

J.-L. Wu and Y.-M. Huang
A novel modularized fast polynomial transform algorithm for two-dimensional convolutions 27

Signal Processing

J.M. Vesin
A nonlinear autoregressive signal model with state-dependent gain 37

C. Nadeu
Finite length cepstrum modelling – A simple spectrum estimation technique 49

A. Kummert, S. Hartwig and A. Hypki
A new adaptive lattice filter for the ARMA modeling of vector signals 61

P. Stoica and R.L. Moses
On the unit circle problem: The Schur–Cohn procedure revisited 95

S.-C. Pei and J.-J. Shyu
Design of real FIR filters with arbitrary complex frequency responses by two real Chebyshev approximations 119

Short communications

Z. Wang and L. Wang
Interpolation using the fast discrete sine transform 131

G. Jacquemod, C. Odet and R. Goutte
Image resolution enhancement using subpixel camera displacement 139

Volume 26, No. 2, February 1992

Papers

J. Mars, N. Martin, J.L. Lacoume and M. Dubesset
Analysis of signals over short time-windows 147

E.F. Velez and R.G. Absher
Parametric modeling of the Wigner half-kernel and its application to spectral estimation 161

D.R. Campbell, T.J. Moir and H.S. Dabis
Multivariable polynomial matrix formulation of adaptive noise cancelling 177

O.W. Kwon, C.K. Un and J.C. Lee
Performance of constant modulus adaptive digital filters for interference cancellation 185

C.-L. Wang and R.-Y. Chen
Optimum design of the LMS algorithm using two step sizes for adaptive FIR filtering 197

P. Stoica, T. Söderström and V. Šimonyté
On estimating the noise power in array processing 205

Y.-C. Hsueh
Mathematical morphology on *l*-images 221

Short communication

J.-L. de Bougrenet de la Tocnaye and A. Hillion
Optical modeling of mathematical morphology: A link between convolution of images, dilation and erosion 243

Book alert 247

Book review 249

Thesis alerts 251

Announcements and calls for papers 253

News 259

Volume 26, No. 3, March 1992

Papers

H.-H. Chen, Y.-S. Chen and W.-H. Hsu
Low-rate sequence image coding via vector quantization 265

R. Hu and M.M. Fahmy
Texture segmentation based on a hierarchical Markov random field model 285

V.A. Topkar and A.K. Sood
Statistical analysis and scale-space 307

C. Kotropoulos and I. Pitas
Constrained adaptive LMS *L*-filters 335

M.L. Hambaba
The robust generalized least-squares estimator 359

H.J. Butterweck, A.C.P. van Meer and J.H.F. Ritzerfeld
A remote identification system based on passive identifiers 369

Short communication

P. Comon
MA identification using fourth order cumulants 381

Announcements 389

Author index 391
